Unveiling the Visual Story: Our video shoot delved deeper, telling the story of each dish and the passionate chefs behind them. It's not just about food; it's about a shared experience that transcends the plate.

Showcasing Togetherness: Onam is a time for unity, and we wanted every shot to resonate with this sentiment. The candid moments of guests laughing, sharing, and savoring each bite were an absolute joy to capture.

A Glimpse of What's to Come: Our visuals aim to transport you to The White Pepper's Onam celebration. As you read this, imagine the aroma of spices, the sounds of joy, and the vivid colors of this cultural extravaganza.

Capturing the Essence of Hollis Mead Dairy: A Journey Through Photography

It's always rewarding to see just how the images I shoot are used in print, web and social media use.

I recently shot some work at [Hollis Mead Dairy](#) and this was the result.

Step into the enchanting world of Hollis Mead Dairy, where nature's bounty meets organic goodness. As a food and drink photographer, I recently had the pleasure of immersing myself in the picturesque landscapes, documenting the products, farm, and incredible staff that make Hollis Mead Dairy a true gem in Dorset. My lens captured the essence of this sustainable haven, while my creativity brought the story to life.

With a commitment to promoting sustainable practices and animal welfare, Hollis Mead Dairy provided me with a wealth of inspiration. I was captivated by the vibrant colors and textures that adorned the products, from the rich hues of freshly churned butter to the creamy goodness of their artisanal cheeses. Every shot was an opportunity to showcase the dedication and passion that goes into creating these culinary delights.

My journey didn't end with capturing the products alone. I ventured into the heart of Hollis Mead's farm, where cows roamed freely amidst lush pastures. The rolling hills and blooming wildflowers served as a natural backdrop, adding depth and character to my photographs. Each click of the shutter conveyed the farm's commitment to sustainability and the close bond between the animals, nature, and the dedicated staff.

Behind every successful endeavor lies a team of passionate individuals. The staff at Hollis Mead Dairy were no exception. Their love for the land and their animals was evident in every interaction, and I was privileged to capture their unwavering dedication. Through my lens, I aimed to highlight the personal touch that sets Hollis Mead Dairy apart—a team that believes in the power of sustainable, organic farming to deliver exceptional taste and quality.

As a food and drink photographer, I find immense joy in sharing stories through my lens. My experience with Hollis Mead Dairy allowed me to create a visual narrative that celebrates their values and products. I believe that every local company in Dorset has a unique story to tell, and I offer my freelance services to bring those stories to life. Whether it's capturing the essence of a farm, the artistry of

a restaurant, or the allure of a local brewery, I have the expertise to showcase your brand in its best light.

Hollis Mead Dairy represents a harmonious blend of organic farming, nature, and delicious dairy products. Through my photography, I aimed to convey their commitment to sustainability and animal welfare. I invite other local companies in Dorset to embark on a visual journey with me, allowing me to capture their stories and promote their brand through my freelance services. Together, we can showcase the beauty, creativity, and values that make Dorset a haven for exceptional food and drink experiences.

A Class Above... Spring Edition of CLASS MAGAZINE

Another day another dollar....

Working on the Spring Edition of CLASS MAGAZINE has been an incredible experience, especially with the fantastic photo shoot we had at the Connaught Bar. The shoot was dedicated to celebrating the 15 years of seamless excellence at the hotel bar, and we wanted to make it unforgettable.

One of the highlights of the shoot was the amazing magazine cover concept that Class Magazine came up with. We utilized three mixologists and a steady stream of liquid flowing from one to another. The image was visually stunning and worked incredibly well on social media platforms, generating a lot of buzz among followers.

The concept also translated well to print, making for a great set of magazine covers. I can't wait to see the hard copy, as I know it will be a great addition to our collection. Sometimes, it's good to go #oldskool and appreciate the physical copies of magazines.

I would like to extend my heartfelt gratitude to Agostino, Maura, and Giorgio, and the Connaught Cocktail team for their contribution to the shoot. Their effort and dedication made it possible for us to create such an unforgettable image. A big clean-up was required after throwing all those drinks around, but it was all worth it for the amazing result we achieved.

In conclusion, the Spring Edition of CLASS MAGAZINE promises

to be a unique and exceptional issue. With an outstanding photo shoot at the Connaught Bar and an amazing magazine cover concept, I'm confident that readers will be thrilled with what is in store for them. I hope to continue to create more memorable shoots in the future and bring our readers the best content possible.

How to cook steak...

For all steaks I advise the following guidelines:

1. Bring your steak to room temperature by taking it out of the fridge for around 1 hour before cooking
2. Use a heavy based frying pan
3. Get your pan hot before cooking, you should see a haze, but it shouldn't be smoking
4. Oil your steak not your pan. Rub your steak with some

good quality rapeseed oil and season well with salt and pepper before cooking. You can season your steaks in advance whilst they are coming to room temperature

5. The cooking timings below are approximate guide and will vary depending on the temperature to begin with and the thickness of the steak, I recommend using a thermometer in the central thickest part of the steak to gage the internal temperature whilst cooking to ensure that the steaks are cooked to your liking.
6. The internal temperatures of the meat steaks below are slightly lower than what it should be. As the steaks rest they will increase in temperature slightly to come to the perfect temperature.
7. A minute before the end of cooking add a knob of butter, a few sprigs of thyme or rosemary and some garlic. For smaller steaks just use one clove of garlic crushed in its skin, for larger steaks such as the tomahawk use half a bulb of garlic and put it on top of the steak before it goes in the oven. Baste the steak with the butter whilst it cooks for the remaining time.
8. Steak should be cooked evenly on both sides with a nice caramelised crust
9. Make sure to rest your steaks for 5 minutes before serving
10. Serve with a delicious sauce or the resting juice
